

TABLE OF CONTENTS

Introduction: What Makes a Place Scenic?	8
A seemingly “natural” rural landscape illustrates design decisions made over generations.	
1 What Is Design?	18
Design is everywhere. But what constitutes “good” design for an imperiled Earth?	
2 Cultivating a Designer’s Mind	34
Anyone with the ability to observe closely, think critically, intuit freely, and maintain an open mind can be a designer.	
3 Understanding the Designer’s Role	46
Envisioner? Arbiter? Contractor? A changing role requires vigilance to serve the client well.	
4 Listening to the Site	62
The core of design relies on observing, recording, assessing, summarizing, and interpreting the systems at work on the land.	

5 Defining the Design Program	134
What is the project really about? Balancing site conditions with client expectations may define underlying challenges.	
6 Thinking Graphically	162
The best designers employ both sides of the brain; graphic and verbal languages inform each other. Illustrate concepts, draw conclusions.	
7 Getting to “Aha!”	186
Sudden moments of recognition or intuition can develop into organizing concepts that bring coherence to a project.	
8 Finding the Form	204
Design responds to human preferences on the land, and is informed by principles of sustainable design.	
9 Principles of Residential Landscape Design	244
Ten highly-illustrated principles help the designer find the relationships that create coherent and resilient site design.	

10 Conclusion	274
Landscape design is a manifestation of hope, and an expression of love for the Earth.	
Appendix 1	
Clues from the Built Landscape	
What contributes to a sense of place? Further clues about the role of design in urban and village settings.

Appendix 2	
Tips for Living the Good Life	
A personal compilation of ways to nurture a creative life, build community, and optimize health.	
	300
Acknowledgments	
From a rural Michigan home to Harvard’s Graduate School of Design, key practitioners and professors made their mark that resulted in the design philosophy and curriculum of the Conway School of Landscape Design.
